

StockEasy — Standard Operating Procedures (SOP v1)

Who uses this: Shop owner, cashier, stock keeper

When: Every working day

App navigation: Home · Products · Sell · History · Returns · Account

1. Roles

Role	Can do
Cashier	Sell, returns, print receipts, search/scan products
Stock keeper	Add/edit products, adjust stock, print labels
Owner / manager	All above + day close, credit book, analytics, account settings

2. Daily opening

1. Open StockEasy (home screen app if installed).
 2. Confirm you are **signed in** (sign in online at least once per day if session expired).
 3. Check **internet** if you need Account, day close, or first-time product load.
 4. Quick check **Products** — fast-moving items show correct stock.
 5. Confirm **printer** is on and has 58mm paper.
-

3. Making a sale (standard)

1. Tap **Sell**.
2. Add items by:
 - **Tapping** product card, or
 - **Searching** by name, or
 - **Scanning** barcode (must match product scan code exactly).
3. Tap **Checkout**.
4. Enter payment:
 - **Full payment** — customer pays total.
 - **Part payment** — record amount received; balance goes to credit book.
5. Complete sale → **receipt** appears.
6. Tap **Print** and give receipt to customer.
7. Tap **Done** to close receipt.

Rules:

- Always print or show receipt for paid sales.
 - Do not sell without recording in StockEasy.
 - If scanner fails, use **search by name**.
-

4. Credit sales (customer owes balance)

1. At checkout, enter **amount received** less than total.
2. Add **customer name/phone** if prompted.

3. Complete sale — receipt shows **Balance due**.
 4. Owner tracks balances under **Account** → **Credit book**.
 5. When customer pays later: Credit book → select customer → **Add payment**.
-

5. Returns

1. Find original sale in **History**.
2. Open receipt → start **Return** (or use Returns → Record a return).
3. Select items and quantities to return.
4. Set **condition** and **disposition** (restock vs write-off).
5. Complete return → print return receipt if needed.

Rules:

- Always link return to **original sale** when possible.
 - Do not restock damaged goods unless manager approves.
-

6. Products & stock

Add new product

1. **Products** → **Add product**.
2. Enter name, price, category, opening stock.
3. Optional: **Generate** or **Scan** a scan code.
4. **Print label** and stick on shelf/product.
5. Save product.

Adjust stock

- Small changes: **Products** → + / – on product card.
- Large corrections: edit product or manager review.

Rules:

- Every product sold in the shop should exist in StockEasy.
 - One scan code per product — no duplicates.
-

7. Barcode labels

1. Product must have a **scan code**.
 2. Open product (edit) or **Products** → **tag icon**.
 3. Wait for **barcode/QR preview** to load.
 4. **Print label** — use 58mm settings (see validation checklist).
 5. Affix label where scanner can read it.
-

8. Offline rules

When **no internet**:

Allowed	Not allowed / limited
Make sales	Save day close

Returns (if cached data exists)	Account settings
Stock adjust (queued)	First login / OTP
View History (cached)	

When internet returns:

- Wait for sync (no action needed usually).
- If **Sync conflicts** appears on Account → resolve with manager.

9. End of day close (owner/manager)

Must be online.

1. **Account** → **End-of-day close**.
2. Count **physical cash** in drawer.
3. Enter counted amounts.
4. Review **variance** (short/over).
5. Add notes if variance exists.
6. **Save** day close.
7. Investigate large variances before next day opens.

10. Receipt printing

- Use in-app **Print** button only.
- Paper: **58mm**, margins **none**, headers **off**, scale **100%**.
- If print is blank: wait for barcode/receipt to load → try again.
- If still failing: use **Save image** (labels) or reprint from **History**.

11. Escalation

Problem	Action
App won't sign in	Check internet; retry OTP
Sale stuck offline	Complete sale; sync when online
Sync conflict	Account → Sync conflicts → manager resolves
Wrong price sold	Manager edit product; note in day close notes
Printer not working	Check paper/power; use PDF test; contact support
