

# StockEasy — Validation Plan & Checklist (v1)

**App:** StockEasy — Simple Inventory for Sierra Leone SMEs

**Currency:** NLe

**Use:** Before go-live and after major updates (receipts, barcodes, offline, day close)

## 1. Test environment

| Item    | Requirement                                |
|---------|--------------------------------------------|
| Device  | Phone/tablet or PC used in the shop        |
| Browser | Chrome or Edge (recommended)               |
| Install | Add to home screen (PWA) if possible       |
| Printer | 58mm thermal (or PDF for testing)          |
| Network | Test both <b>online</b> and <b>offline</b> |

## 2. Printer setup (58mm)

Before receipt/label tests, set in the print dialog:

- Paper: **58mm** / Receipt / custom 58mm wide
- Margins: **None**
- Headers & footers: **Off**
- Scale: **100%** (not "Fit to page width")

Use the in-app **Print** button — not Ctrl+P.

## 3. Validation checklist

**Tester name:** \_\_\_\_\_

**Date:** \_\_\_\_\_

**Shop:** \_\_\_\_\_

Mark: Pass | Fail | Skip | N/A

### A. Login & access

| #  | Test                   | Steps                                         | Expected                                  | Result |
|----|------------------------|-----------------------------------------------|-------------------------------------------|--------|
| A1 | Sign in online         | Open app → sign in with OTP                   | Lands on Home dashboard                   |        |
| A2 | Stay signed in offline | Sign in once online → go offline → reopen app | Can use Sell, Products, History, Returns  |        |
| A3 | Account offline        | Go offline → tap Account                      | Account disabled or shows offline message |        |

### B. Products & stock

| #  | Test               | Steps                      | Expected                           | Result |
|----|--------------------|----------------------------|------------------------------------|--------|
| B1 | View products      | Products tab               | List loads with name, price, stock |        |
| B2 | Add product        | Products → Add → save      | Product appears in list            |        |
| B3 | Edit product       | Edit name/price → save     | Changes show on Products and Sell  |        |
| B4 | Quick stock adjust | Products → + / - on card   | Stock count updates                |        |
| B5 | Low stock          | Product at/below threshold | Warning shown on product           |        |

### C. Barcode / scan code & labels

| #  | Test                     | Steps                                         | Expected                              | Result |
|----|--------------------------|-----------------------------------------------|---------------------------------------|--------|
| C1 | Generate scan code       | Add/Edit product → Generate                   | Code appears (e.g. SE-...)            |        |
| C2 | Label preview            | Toggle Barcode / QR                           | Preview shows name, price, code image |        |
| C3 | Print label              | Print label (wait for barcode to load)        | 58mm label only — no dialog chrome    |        |
| C4 | Save label PNG           | Save image                                    | PNG downloads with barcode + text     |        |
| C5 | Print from Products list | Products → tag icon on product with scan code | Label dialog → print works            |        |

### D. Sales (Sell)

| #  | Test                  | Steps                                    | Expected                              | Result |
|----|-----------------------|------------------------------------------|---------------------------------------|--------|
| D1 | Manual sale           | Sell → tap product → Checkout → pay full | Receipt shows; stock reduced          |        |
| D2 | Search by name        | Type product name in search              | Correct product found                 |        |
| D3 | Scan at sell          | Scan product barcode (exact code)        | Product added to cart                 |        |
| D4 | Part payment / credit | Checkout → pay less than total           | Receipt shows balance due             |        |
| D5 | Print receipt         | Receipt dialog → Print                   | 58mm receipt; shop name, items, total |        |
| D6 | Receipt reprint       | History → open sale → Print              | Same receipt reprints correctly       |        |

### E. Returns

| # | Test | Steps | Expected | Result |
|---|------|-------|----------|--------|
|---|------|-------|----------|--------|

|    |                      |                         |                                               |  |
|----|----------------------|-------------------------|-----------------------------------------------|--|
| E1 | Return from History  | History → sale → Return | Sell opens in return mode linked to sale      |  |
| E2 | Process return       | Select items → complete | Return receipt; stock updated per disposition |  |
| E3 | Link to original     | Open return receipt     | Shows link to original sale                   |  |
| E4 | Print return receipt | Print on return receipt | Prints correctly                              |  |

## F. Credit book (Debtors)

| #  | Test                 | Steps                          | Expected                                 | Result |
|----|----------------------|--------------------------------|------------------------------------------|--------|
| F1 | View debtors         | Account → Credit book          | Lists customers with balance             |        |
| F2 | Collect payment      | Add payment on debtor          | Balance reduces; receipt/history updates |        |
| F3 | Print debtor receipt | Print from debtor receipt view | Prints correctly                         |        |

## G. Offline

| #  | Test                 | Steps                     | Expected                               | Result |
|----|----------------------|---------------------------|----------------------------------------|--------|
| G1 | Sale offline         | Offline → complete sale   | "Saved offline" message; receipt shown |        |
| G2 | Sync when online     | Reconnect internet        | Sale syncs; receipt gets permanent ID  |        |
| G3 | Stock adjust offline | Offline adjust on product | Queued; applies when online            |        |
| G4 | Sync conflicts       | If conflicts appear       | Account → Sync conflicts → resolve     |        |

## H. End of day

| #  | Test              | Steps                         | Expected                              | Result |
|----|-------------------|-------------------------------|---------------------------------------|--------|
| H1 | Day close preview | Account → End-of-day close    | Shows expected cash/payments for date |        |
| H2 | Count cash        | Enter counted cash            | Variance calculated                   |        |
| H3 | Save day close    | Save (must be <b>online</b> ) | Saves successfully                    |        |
| H4 | Day close offline | Try save while offline        | Save blocked with clear message       |        |

## I. Branding

| #  | Test                 | Steps                       | Expected                 | Result |
|----|----------------------|-----------------------------|--------------------------|--------|
| I1 | Shop name on receipt | Print receipt               | Business name on receipt |        |
| I2 | Logo on receipt      | Set logo in Account → print | Logo appears on receipt  |        |

## 4. Sign-off

| Role             | Name | Signature | Date |
|------------------|------|-----------|------|
| Shop owner       |      |           |      |
| Cashier / tester |      |           |      |
| Tech support     |      |           |      |

**Go-live approved:** Yes / No — blockers: \_\_\_\_\_

---

## 5. Known limits

- Browser print depends on **58mm paper settings** in the print dialog.
- **Account** tab needs internet.
- **Day close save** needs internet.
- Offline sales sync when connection returns.
- Handheld Sunmi/BT printers may need PNG share or native printer app instead of browser print.
